Hi all, just completed a new video of the boys, filmed back in early December 2009. They where going round and round the house, So I got a few clips and put this together.

The music is called " [Mad Robot](#) " by [Atomic Cat](#) from France. Released on the album called, " [A Call from Hope](#) ". They do Trance and Dance style music, pretty good and they have a number of albums. The album is released under the [Creative Commons license](#)

.

The sound effect is by [Heigh-hoo](#) from the [Freesound web site](#) . I used his [MSchFerr](#) file (Micheal Schumaker Ferrari) from the [Japanese Grand Prix pack of sounds](#) . It came as a mono sound and I modified it using [Audacity](#) for stereo. I hope I got the sounds in the right direction as I am sure my speakers are the wrong way around. This file is also released under the [Creative Commons license](#)

.

I used the new version of [Kdenlive](#) to edit, which changed two minor versions while doing this clip (from 0.7.5 to 0.7.6 to 0.7.7), and that is why there is a minor discrepancy with the resolution. Not a major issue though. I also used [Kdenlive](#) to do the whole lot. I can now do titling in [Kdenlive](#) and will start experimenting with that more to see how fancy I can make them.

The new version of [Kdenlive](#) is pretty good, and has the plugins well organised and easy to find. It also now crashes much less, I had it crash only once while doing this clip, and I think that was version 0.7.6 that did, but I am not really sure in all honesty.

Any way, enjoy my two boys riding around the house on their trike's.
